# Physical Science Reference Tables

## MOTION AND ENERGY

$$\bar{v} = \frac{\Delta d}{\Delta t}$$

$v$  = velocity

$\frac{m}{s}$  - velocity

$d$  = position

$$a = \frac{v_f - v_i}{\Delta t}$$

$t$  = time

$\frac{m}{s^2}$  - acc.

$a$  = uniform acceleration

$$F = ma$$

$F$  = force **N**

**N** - weight ( $F_g$ )

$$F_g = mg$$

$m$  = mass

**kg** - mass

$$W = F\Delta d$$

$F_g$  = weight

$$P = \frac{W}{\Delta t}$$

$g$  = acceleration due gravity on Earth = 9.8 m/s/s

$W$  = work

$$PE_g = mgh = F_g h$$

$P$  = power

$PE_g$  = gravitational potential energy

$$KE = \frac{1}{2}mv^2$$

$h$  = height

---

$$v_w = f\lambda$$

$KE$  = kinetic energy

$v_w$  = wave velocity

$f$  = frequency

$\lambda$  = wavelength

## **ELECTRICITY**

$$V = IR$$

$V$  = electrical potential difference

$I$  = current

$$P = VI$$

$R$  = resistance

$P$  = power

## **DENSITY**

$$D = \frac{m}{V}$$

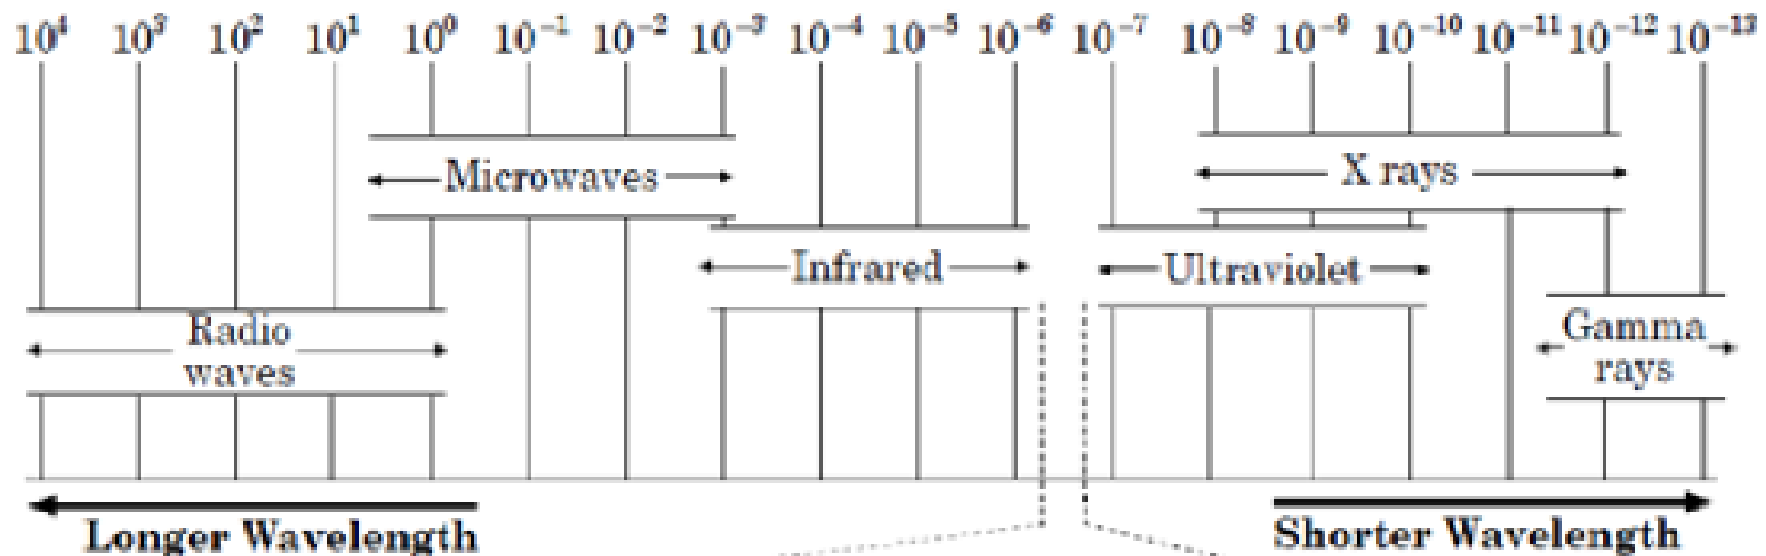

$D$  = density

$m$  = mass

$V$  = volume

# Electromagnetic Spectrum

(measurement in meters)

## Visible Light

Frequency  
Energy ↓

↑ frequency  
Energy

## Polyatomic Ions

$\text{NH}_4^+$	Ammonium
$\text{C}_2\text{H}_3\text{O}_2^-$	Acetate
$\text{ClO}_3^-$	Chlorate
$\text{MnO}_4^-$	Permanganate
$\text{NO}_3^-$	Nitrate
$\text{OH}^-$	Hydroxide
$\text{CO}_3^{2-}$	Carbonate
$\text{CrO}_4^{2-}$	Chromate
$\text{SO}_4^{2-}$	Sulfate
$\text{PO}_4^{3-}$	Phosphate

# Forces and Newton's Laws

Balanced  
Constant Velocity (may be ZERO)

---

unbalanced  
Acceleration

# Newton's Laws

**1st Law:** An object at rest...unless an unbalanced force acts.

---

**2nd Law:**  $F = m a$  or  $F_g = m g$

- If the force increases, acceleration increases!
  - If mass increases, acceleration decreases!
- 

**3rd Law:** For every action there is an equal but opposite reaction!!

--If the force of the book pushing on the desk is 30 N, then the force of the desk pushing back on the book is....?

30 N

# Energy

Potential Energy: has to do with height!!

--with pictures, higher has more potential!

Kinetic Energy: has to do with velocity!

--faster...more KE, slower...less KE

Conservation of Energy: Total Energy(Mechanical Energy stays the same!

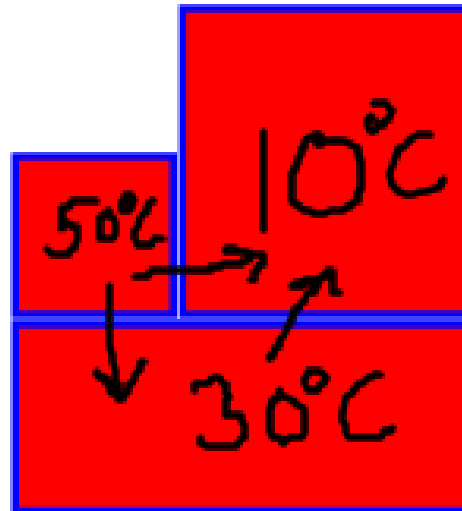

--with pictures, Higher(more PE, less KE)

Lower(less PE, more KE)

# HEAT

\*\*Heat always flows from High(temp) to Low(temp)!!

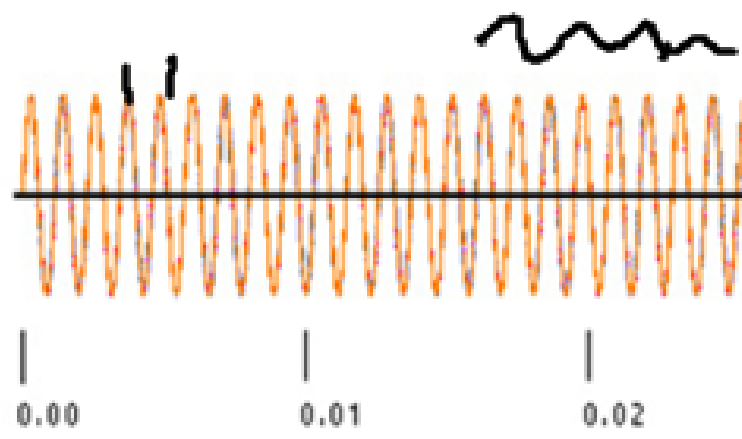

In order to figure out direction of heat flow, all you have to do is look at the temperatures!!

# Waves

Comparing waves:

Frequency, wavelength, amplitude (amount of Energy)

# Electricity:

$$V = \underline{I} R$$

--Be able to use Ohm's law ( $V=IR$ )

--If  $V$  increases, current increases

--If  $R$  increases, current decreases

$$\frac{V}{I} = \frac{10}{R} = 5$$

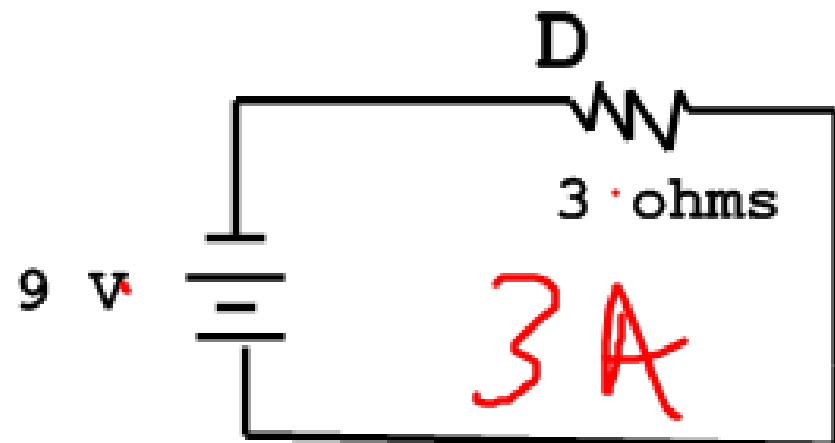

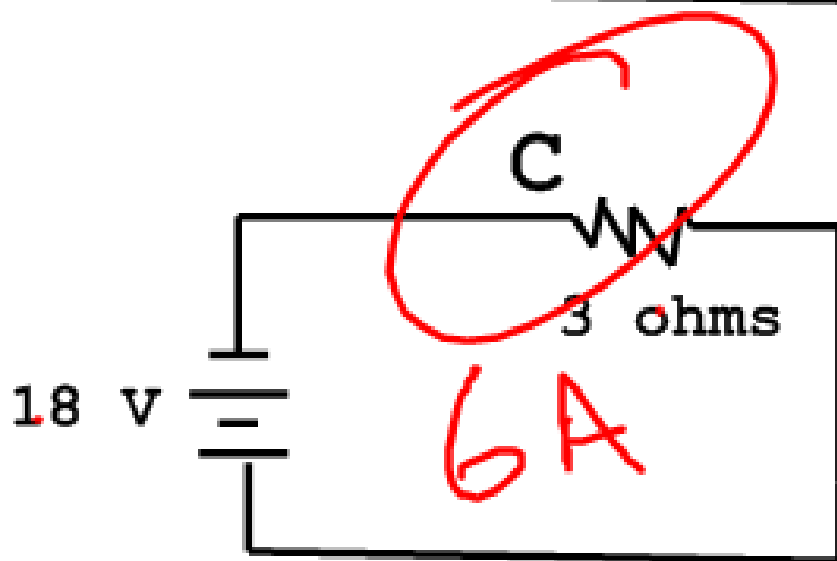

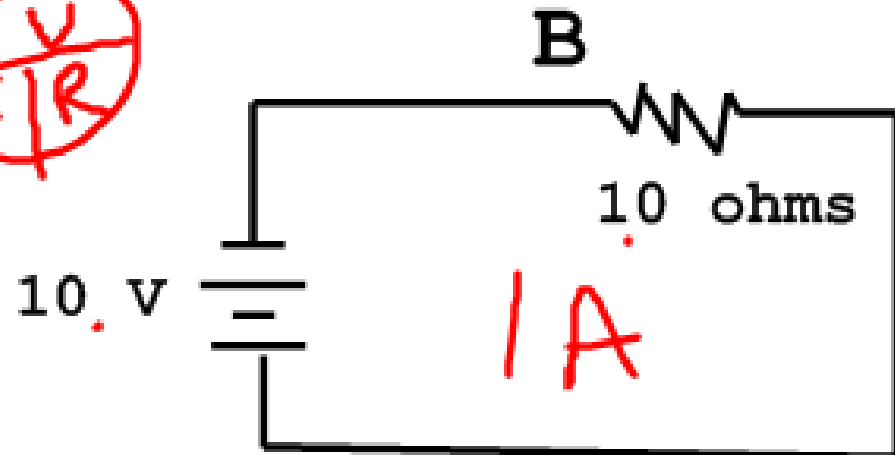

Find Current:

$$\underline{\underline{I = 2A}}$$

Which has the most current?

$$I = \frac{V}{R}$$

# Charging objects:

Remember: Objects (and atoms) become charged by gaining or losing electrons.

--Lose electrons, becomes +

--Gain electrons, becomes -

~~a) +, by gaining protons~~

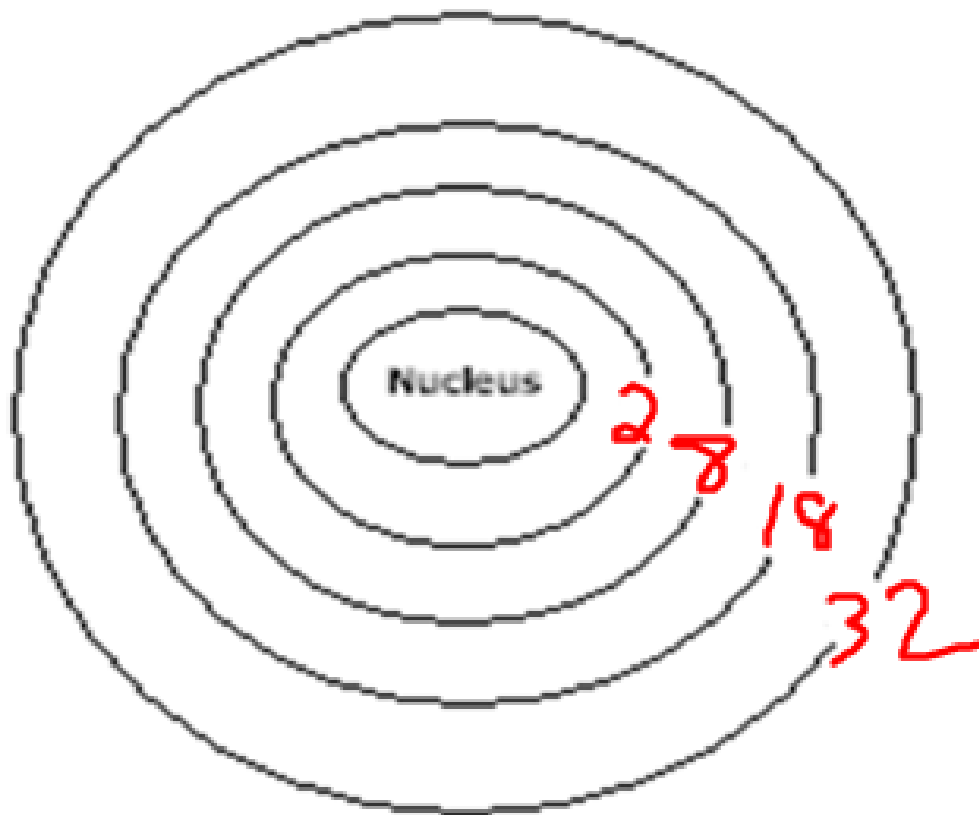

~~b) +, by losing protons~~

c) -, by gaining electrons

d) +, by losing electrons

$Q =$

# Atom Stuff

What goes where?

Protons and Neutrons  
inside nucleus

Electrons outside  
nucleus

Rutherford

--discovered Nucleus

--Gold Foil Experiment

Dalton

Thomson

--Plum Pudding

--discovered electrons

Bohr

--Planetary

Model

--orbitals

If this is something you need to write on your formula sheet, then write it!!  
--Also Know What Each Represents(write it also if you need to)!!

The diagram shows a square box representing an element's information. Inside the box, from top to bottom, are: the number 6 (circled in red), the letter C, the word Carbon, and the number 12.01 (underlined in red). Blue arrows point from each of these four items to labels on the right. The labels are: Atomic Number (# of protons) (with # of protons underlined in red), Chemical Symbol, Element, and Average Atomic Mass (with Mass # underlined in red). Below the Average Atomic Mass label, the text 'protons + neutrons' is written in red.

6	→	<b>Atomic Number</b> ( <u># of protons</u> )
C	→	<b>Chemical Symbol</b>
Carbon	→	<b>Element</b>
<u>12.01</u>	→	<b>Average Atomic Mass</b> (round it to get <u>Mass #</u> ) protons + neutrons

(A) 4 4

1. How many protons does Carbon have?

6

2. How many neutrons does carbon have?

$$12 - 6 = 6$$

3. How many electrons does carbon have?

6 same as protons

4. How many electrons are in the 1st energy level of a carbon atom?

2

5. How many electrons are in the 2nd energy level of a carbon atom?

4 only 6 total

19 K Potassium 39.10	
27	

How many electrons are in the 3rd energy level of Potassium?

2 - 8 - 9  
1<sup>st</sup> 2<sup>nd</sup> 3<sup>rd</sup>

## Types of Chemical Reactions:

### 1. ~~Synthesis~~

### 2. ~~Decomposition~~

### 3. Single Replacement

### 4. Double Displacement

# Types of Nuclear Reactions:

--involve only the nucleus

## 1. Nuclear Fission(Big to small)

*Handwritten red notes:*  
fission  
Fission

## 2. Nuclear Fusion(small to big)

# Acids and Bases:
